

# Corporate Presentation

We're experts in energy management  
and commercialization.

## OVERVIEW

# Introduction

Chile is advancing strongly in its race to achieve the energy goal and we seek to be an important part of it. We're committed with the constant search for resources to collaborate with the goals that Chile has set in terms of energy generation.

ABOUT

# Chile and the Electromobility Strategy

Chile established the National Electromobility Strategy, which indicates that the 100% of the commercialization of light and medium vehicles, public transport and heavy machinery will be zero emissions by the year 2035.

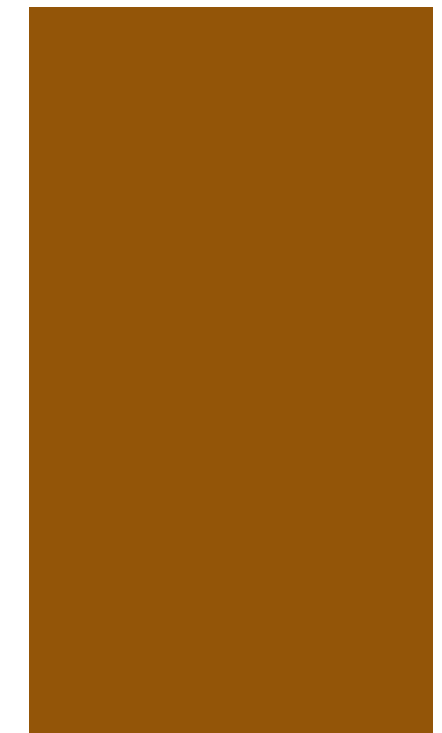

## THE COMPANY

# Chile Lands & Minerals

We deliver value in the marketing chain through management with different stakeholders based on 5 solutions.

- ✓ We manage land lots.
- ✓ We commercialize PMGD and Utility Scale Projects.
- ✓ We manage energy projects.
- ✓ We have expert consultants in Chile and in other countries.
- ✓ We provide the process management for your projects.

WHAT WE DO

# We commercialize Electrical Energy

Chile Lands & Minerals is a company that contributes to the development of people and the Chilean community, through the management and commercialization of energy projects.

Since 2012, we have provided solutions in every stage of our projects and acted as an authorized intermediary to make negotiations and close business deals between the developer and the buyer. In Chile Lands, we have the required experience and track record in the market to carry out your projects successfully.

ABOUT

# Our Essence

## We discover new horizons

We discover and analyze new horizons that will be the reason for future generations' progress.

## Our origin

We were born as a result of the entrepreneurial essence of our country with the effort of each of our collaborators.

## ABOUT US

# Our Company

We are a company open to the world to discover new paths, create and add value to other organizations and their collaborators, with a long-term view, working responsibly and with a serious commitment.

We want to contribute to the growth and development of people and the Chilean community. We wish to be relevant players in the global energy market, always feeling proud of our origin and committed to the hardworking spirit that encourages us.

## Mission

We are committed to contributing to the development and creation of value in Chile and each of the countries where we have a presence. We face challenges with effort and responsibility, and we are constantly searching for strategic opportunities to contribute to the prosperity of our clients.

## Vision

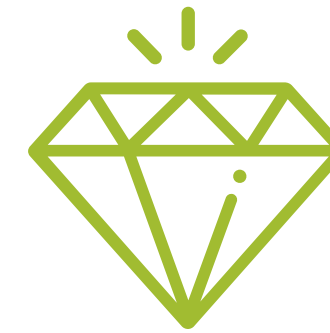

To become a recognized company in a global energy market that is increasingly demanding and connected, a company that has the ability to insert itself into current times, through innovation and the discovery of constant challenges.

GET TO KNOW US

# Corporate Objectives

We know that your objective as a client is vital and we try to accompany you in each of the stages in order to achieve your goal.

We want to be the best reference in the energy market due to our way of working and also to the trust, respect and mutual benefit that we have established with society, our collaborators and clients.

## Create and add value

We want to create value, innovating and managing relevant projects in the Chilean market.

## Contribute to growth

We are in the constant search of growth and development of society and our customers.

## Build trust in our business relationships

We honor our commitments and take responsibility for our actions and decisions.

OUR TEAM

# Meet the CEO

**Paula Villar**

Founder and General Manager

“Energy as one of the noblest resources from its origin, at the complete service of society and its development, deserves to be part of a new commitment that revolves and builds around investment and growth, each day a little less linked to state policy and more focused on business development.”
